## PRECAUTIONS

**KEEP OUT OF REACH OF CHILDREN:** Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

Wear a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes during mixing, loading, application, clean-up and repair.

**DO NOT** remove bait from the station.

**DO NOT** place on food preparation items/surfaces or directly over food

**FIRST AID:** If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not give **any** liquid to the person. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If in eyes, hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Product contains peanut butter and soy which may cause anaphylactic type reactions in some sensitive individuals. This product contains petroleum distillates. Treat symptomatically.

## DIRECTIONS FOR USE

Prescription Treatment brand AVERT 360A Dual Choice Ant Bait Stations contain a slow acting insect bait. For best results, placement of the bait should be into or near insect harborage sites.

**ANTS:** Concentrate treatment at insect activity sites. Ants are attracted to the bait and it is carried back to the nest. Prescription Treatment brand AVERT 360A Dual Choice baits are packaged in a child-resistant container.

1. Break bait stations apart from the plastic frame.
2. For thorough ant control, use as many bait stations as necessary (normally 3-4 stations for an average size room or 6-8 stations for a heavy infestation).
3. For best results, also place bait stations along walls, baseboards, in corners, under sinks, in cabinets, pantries, near plumbing, electrical lines, potted plants, waste receptacles, sensitive electronic equipment, inside drop ceilings, wall voids, under and around equipment and appliances.
4. Replace bait stations when necessary, approximately every 3 months.

**APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS:** Food handling establishments include places other than private residences in which food is held, processed, prepared or served.

**FOOD AREAS:** Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups).

Avoid contamination of food. Use as instructed above.

**STORAGE:** Store in a cool, dry area inaccessible to children.

**DISPOSAL:** Do not reuse empty container. Dispose of empty carton and used bait stations in garbage. For information on disposal of unused, unwanted product, contact the registrant or the provincial or territorial regulatory agency. Contact the registrant and the provincial or territorial regulatory agency in case of a spill, and for clean-up of spills.

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest control Products Act* to use this product in a way that is inconsistent with the directions on the label.
