This label has been updated according to the re-evaluation decision of Pyrethrins RVD2023-06. While users are encouraged to follow this updated label immediately, the previously approved label is valid until 03/02/2025 in accordance with the phase out period set out in RVD2023-06. This previously approved label will be provided upon request by emailing hc.pmra.info-arla.sc@canada.ca. In your email please include the product name and Registration number of the label you are requesting.

SCORPIO Ant Granule

COMMERCIAL

INSECTICIDE

SOLUBLE GRANULE

For outdoor use around and on the perimeter of listed structures and for outdoor use on decks, patios and balconies to kill ants.

For outdoor use on ant nests around listed structures to kill ants.

READ THE LABEL BEFORE USING

KEEP OUT OF REACH OF CHILDREN

Warning, contains the allergens milk and sesame seeds

ACTIVE INGREDIENT: Pyrethrins 0.175%

REG. NO. 33342 P.C.P. ACT

Net Contents: 0.5 – 960 kg

W. Neudorff GmbH KG, An der Mühle 3, 31860 Emmerthal, Germany

Canadian Agent Neudorff North America PO Box 178 Brentwood Bay, BC V8M 1R3 250-652-5888

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offense under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN.

Wear a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes during mixing, loading, application, clean-up and repair.

DO NOT enter or allow worker entry into treated areas for twelve (12) hours following application.

ENVIRONMENTAL PRECAUTIONS:

Toxic to aquatic organisms. To reduce runoff from treated areas into aquatic habitats avoid application to areas with a moderate to steep slope, compacted soil, or clay. Avoid application when heavy rain is forecast. Contamination of aquatic areas as a result of runoff may be reduced by including a vegetative filter strip between the treated area and the edge of the water body. Toxic to bees. However, this product is not systemic and when used according to label directions, minimal exposure or risk is expected.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

FIRST AID:

If in eyes: hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control centre or doctor for treatment advice. If on skin or clothing: take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

STORAGE: Store this product away from food or feed. Store in a cool dry place. Keep container closed.

DISPOSAL:

- 1. Triple- or pressure-rinse the empty container.
- 2. Follow provincial instruction for any required additional cleaning of the container prior to its disposal.
- 3. Make the empty container unsuitable for further use.
- 4. Dispose of the container in accordance with provincial requirements.
- 5. For information on disposal of unused, unwanted product contact the manufacturer or provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

USE SITES AND DIRECTIONS FOR USE

FOR OUTDOOR USE ONLY

DO NOT apply when people or pets are present.

SCORPIO Ant Granule will kill ants.

As this product is not registered for the control of pests in aquatic systems, DO NOT use to control aquatic pests. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

SCORPIO MAY BE APPLIED IN THE FOLLOWING OUTDOOR AREAS: landscaped areas, ornamental gardens, turf (such as lawns, athletic fields, recreational areas, golf courses, commercial turf, sod, and grass buffers), non-crop areas (such as parks, playgrounds, cemeteries, picnic areas, roadsides, campgrounds, industrial sites, fallow land), decks, patios, balconies, pathways, sidewalks, driveways, right-of-ways; on ground around residential, institutional, commercial and industrial structures. Apply in areas that are protected from direct sunlight, if possible. For heavy infestations use the higher rate as listed in the instructions for specific application methods. Treatment must only be repeated after 7 days if pest problem persists or reoccurs. DO NOT exceed 24 applications per year.

Apply only when the potential for drift beyond the area to be treated is minimal. Take into consideration wind speed, wind direction, temperature inversions, application equipment and sprayer settings.

How to Apply:

APPLY AS AN OUTDOOR PERIMETER OR BROADCAST TREATMENT ONLY. Perimeter application is 1 m or less out from the building's foundation and to a maximum height of 1 m starting where the foundation meets the ground. Broadcast application is to large outdoor structural surfaces (roofs, walls, doors, windows and foundations).

Perimeter Treatment: Scatter granules at a rate of 10-15 g/m² in a 30 cm wide band around the foundations of structures. Apply in early morning.

Broadcast Treatment: Scatter granules at a rate of 10-15 g/m² on ant runs, around nests, hills, mounds and other ant-frequented areas. Apply in early morning.

FOR OUTDOOR USE AROUND LISTED STRUCTURES

Broadcast Treatment: Scatter granules at a rate of 10-15 g/m2 on ant runs, around nests, hills, mounds and other ant-frequented areas on landscaped areas, ornamental gardens, turf, non-crop areas, pathways, sidewalks, driveways and right-of-ways. Apply in early morning.

Drench application to ant nests: Dissolve 20-50 g of granules in 1 L water and apply to a 1 m² area around ant nest entrances. This method of treatment is most effective in the evening or early morning when ants are in the nest.

RESISTANCE MANAGEMENT RECOMMENDATIONS

For resistance management, Scorpio Ant Granule contains a Group 3 insecticide. Any insect population may contain individuals naturally resistant to Scorpio Ant Granule and other Group 3 insecticides. The resistant individuals may dominate the insect population if this group of insecticides is used repeatedly in the same locations. Other resistance mechanisms that are not linked to site of action but are specific for individual chemicals, such as enhanced metabolism, may also exist. Appropriate resistance-management strategies should be followed. To delay insecticide resistance:

- Where possible, rotate the use of Scorpio Ant Granule or other Group 3 insecticides with different groups that control the same pests in the location to be treated.
- Insecticide use should be based on an IPM program that includes scouting and record keeping, and considers cultural, biological and other chemical control practices.
- Monitor treated pest populations for resistance development.
- Contact your local extension specialist or certified crop advisors for any additional pesticide resistance-management and/or IPM recommendations for the specific site and pest problems in your area.
- For further information or to report suspected resistance contact W. Neudorff GmbH KG at 250-652-5888 or at www.neudorffpro.com.

Optional statements:

- -PCO (Pest Control Operator)
- -For PCO use
- -Kills (foraging ants), (sweet-feeding ants), (pavement ants), (moisture ants), (little black ants), (argentine ants), (acrobat ants), (cornfield ants), (field ants), (ghost ants), (odorous house ants), (thief ants), (Harvester ants), (Fire ants), (Pharaoh ants), and other common ants
- -Easy to apply (dry product) (granules).
- -The product is easy to use, clean to handle and economical.

- May be used around commercial and agricultural buildings
- Apply directly to ants, their mounds, nests and trails, and where ants are entering the (building)(premises)
- -Dry or drench application
- -Can be used dry or dissolved in water
- This xx (kg) (g) container treats xxxx m²
- -Made with botanical pyrethrins from chrysanthemum flowers.
- Made from chrysanthemum flowers.
