

Reminder of **Best Use Practices** for **DEMAND[®] CS Insecticide.**

DEMAND CS is a fast acting stomach and contact insecticide with residual control of insect pests in residential, industrial, and commercial buildings and structures (including animal housing and on modes of transport). The product label outlines not only how Demand CS should be used, but also what precautions should be taken to ensure that its use does not affect the health and safety of the operator as well as those that live and work in the area to be treated.

As with any pesticide product, **it is important to follow the directions for use** specified on the label.

BEFORE & DURING APPLICATION

Wear appropriate protective equipment as specified on the product label.

Vacate premises. No people, pets or animals should be present during application. Application to food service areas is only permitted during closed down periods.

Do not over apply. Apply the rate stated on the label and strictly follow the directions for use.

Most uses require only crack or crevice application, such as around baseboards, behind furniture, and around buildings.

Do not apply to furniture surfaces or mattresses where people will be laying or sitting.

AFTER HANDLING & APPLICATION

Re-entry should not be permitted until residues are dry.

Keep unused product in original container tightly closed, locked up and away from food.

Avoid touching face with contaminated gloves or clothing. Wash gloves before removal.

After each use, clean and maintain reusable PPE according to the directions and separate from household items.

Any treated surface that may contact food products must be washed and rinsed thoroughly with potable water before use.
